

## **FPA Supports Pharmacy Practice Survey**

During the week of May 19, 2008, a survey called the “2008 Florida Pharmacist Survey” will be mailed to a random sample of 2,400 pharmacists licensed in the State of Florida by researchers at Nova Southeastern University (NSU) College of Pharmacy. This 4-page survey will ask questions about pharmacists’ primary place of employment regarding issues such as number of hours worked, position, compensation, types of patient care services provided, and job satisfaction. If you receive this survey, please complete and return it to NSU. Your response is very important because it represents the view of many pharmacists like you and is valuable for studying and reporting key information related to the pharmacist workforce in Florida. Study findings will be published in our journal “Florida Pharmacy Today” so that you can compare your own personal and work characteristics to those of other pharmacists licensed in Florida. If you have any questions concerning the study or in completing the survey, please contact Dr. Nisa Sangasubana at (954) 262-1332 or email [sangasub@nova.edu](mailto:sangasub@nova.edu).
